UTA Flight 772 was a scheduled flight operating from Brazzaville in the Republic of Congo to Paris CDG airport in France.

This is the flight path. UTA Flight 772 was a scheduled flight operating from Brazzaville in the Republic of Congo to Paris CDG airport in France. The flight never made it. All on board perished.

Eighteen years later, families of the victims gathered at the crash site to build a memorial.

Due to the remoteness of the location, pieces of the wreckage could still be found at the site.

The memorial was created by Les Familles de l'Attentat du DC-10 d'UTA, an association of the victims' families along with the help of local inhabitants.

The memorial was built mostly by hand and uses dark stones to create a 200-foot diameter circle

The Tenere region is one of the most inaccessible places on the planet. The stones were trucked to the site from over 70 kilometers away.

The memorial was built over the course of two months in May and June of 2007.

170 broken mirrors, representing each victim, were placed around the circumference of the memorial.

The memorial is anchored by the starboard wing of the aircraft which was trucked to the site from 10 miles away. Workers had to dig up the wing and empty it of sand.

A la mémoire des 170 victimes de l'attentat du 19 septembre 1989 contre le DC10 d'UTA

The memorial was partly funded by the \$170 million compensation package provided by the Libyan government.

Six Libyans were ultimately convicted of this terrorist attack. They used a suitcase bomb to blow up the plane, which resulted in 155 passengers and 15 crew members meeting their demise.

Even in the face of this tragedy, the families constructed this beautiful memorial to never forget what happened. They will live on in their hearts, in the desert, and even on Google Earth forever.
